Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/15/03 has been entered.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell et al. (5792172) in view of Felt et al. '452. Fig. 3 shows a balloon catheter having an elongated shaft **12** and a lumen **19** therein. It can also be seen there is a balloon **52** on the distal section of the shaft. Fischell teaches the balloon is sealingly secured to the shaft so the interior is in fluid communication with the lumen, col. 2, lines 30-38. Fig. 4 illustrates the balloon has a folded noninflated configuration. However, Fischell et al. do not disclose the balloon is made of a polycarbonate based aromatic polyurethane copolymer. Felt teaches a balloon made from a polycarbonate based aromatic polyurethane copolymer or trade-name Bionate, col. 34, lines 56-58,63. The

Art Unit: 3738

balloon material of Felt is inherently axially noncompliant. The examiner asserts that the claimed physical properties (in this case, balloon compliance *about* 0.012 to *about* 0.016 mm/atm and a tensile elongation of *about* 250%, a flex modulus *about* 300,000 psi and a rupture pressure greater than 18 atm) are present in the prior art material to some extent even though they are not explicitly recited. Therefore, the examiner hereby burdens the applicant to show that these properties are not present in the prior art.

Please note the process of obtaining the polyurethane block copolymer is irrelevant to claim and given no weight because the materials for the balloon are the same.

Regarding claim 6, Felt et al. teach that polycarbonates are synthesized using the chain extender 1,4 butanediol, col. 18, lines 53-55,64-66. It would have been obvious to one of ordinary skill in the art to use Bionate as taught by Felt et al. for the balloon of Fischell et al. such that a noncompliant balloon is used to fully deploy the stent and provide optimal flexibility, tensile strength and elongation, (Felt. col. 34, lines 65-67).

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
